INTRODUCE

Professional programmer with solid skills in software development. I have expertise in multiple programming languages such as JavaScript, Python, and SQL, along with modern technologies such as React, Node.js. I have participated in developing many projects ranging from internal management software to web applications. My ability to learn quickly and my hard-working spirit help me always be ready to face new challenges, making valuable contributions to the development team and the organization.

LANGUAGE

- English

- Japanese

PROJECT

Team project management software Fronend

Interface built using Vite, React and TailwindCSS technologies. Target of the project is to provide a smooth, modern user experience for people use

RESTful APIs Backend

Build add, edit, and delete functions for users
